Proudly Australian Made

Speciality Handmade Soaps

Our handmade soap is made from scratch using only high quality natural ingredients. Our soap is scented with only luxurious pure essential oils or high quality fragrant oils. We also add goats milk, honey and clays for an extra special touch of luxury and natural botanicals for exfoliating texture. We add no chemicals, phosphates, sodium lauryl sulphates or parabens.

In our hand crafted soap we use the cold process in which all our ingredients are mixed at a low temperature. This process retains all the natural goodness of the base oils and essential oils. In the saponification process large quantities of natural glycerine is produced which remains in the final bar of soap. All our soaps are very long lasting, produce an abundant creamy lather and leave skin feeling clean and fresh. Handmade soap does not strip your skin of its natural oils the way commercial products can. Try a bar of natural handmade soap and test for yourself, handmade soap must be experienced to be appreciated fully.

Pure Essential Oils

Essential oils are a true miracle of nature and have been used since the beginning of time to treat, heal and soothe physical, emotional and spiritual ills – bringing balance to mind, body and soul. It is the fine science of combining these oils and balancing their unique properties, which allows us to bring the benefits of nature to our handcrafted soap. Basically, Mother nature provides the ingredients, we just create the “recipes”.

Natural Australian Clays

Clays have been used to benefit the skin since ancient times. Minerals are absorbed through the skin to clean, nourish and soften. Our beautiful clay soaps will help moisturise the skin, remove dead skin cells, revitalise the complexion and remove toxins from your skin. Australia’s ancient geology provides us with a huge range of minerals. Clay is a natural resource taken from the earth’s crust. Over millions of years of weathering, rocks are broken down into smaller and smaller particles, forming into clay.

Pure & Natural Honey

Our honey soaps are made with pure natural honey. Honey is renowned for its healing abilities and antibacterial properties. Excellent for moisturising dry skin, acne prone skin and eliminating bacteria on the surface of the skin.

Aloe Vera

Research has indicated that aloe vera is a super hydrating agent which penetrates our skin much quicker than water and is absorbed even deeper. There is no better way to keep skin smooth, nourished and moisturised. Our aloe vera soaps are made with pure aloe vera oil.

What is so Special about Handmade Soaps?

Handmade soap does not strip your skin of its natural oils the way commercial soaps can. In handcrafted, homemade soap the moisturising glycerine remains in the soaps.

Our handmade soap is truly 100% natural from start to finish. You can feel the difference!

When you use our soap, you are nourishing your skin, not drying it out. The lather that our soap creates is extremely creamy and bubbly and will leave your skin feeling soft and supple.

Treat yourself today and find out how good natural handmade soap can be to your skin.

Goats Milk Soaps

Our goats milk soaps are made with 100% pure fresh organic Australian goats milk, not powdered milk.

Goats milk soap greatly benefits the skin and has a PH similar to that of our own skin, so it protects by not stripping away natural oils. It actually functions as an anti bacterial soap without destroying the good bacteria that exists on our skin. Therefore, it benefits people that are eczema or acne prone.

Goats milk contains lots of nutrients like fats, proteins and other hormones that naturally benefit the skin. The benefits of goats milk can be felt by people suffering from various skin conditions or those just wanting to maintain youthful, rejuvenated skin.

Herbal

Head Lice Soap

A fantastic soap with proven results. Just use regularly instead of normal shampoo to help eradicate & prevent head lice. It contains all natural ingredients with tea tree, pennyroyal, citronella & neem high quality essential oils.

Essential oils promote healing and create an environment that lice do not like. Lice are attracted to humans because of our smell, this blend of essential oils help to cover that smell making herbal head lice soap great for assisting in controlling and preventing head lice.

Tea Tree essential oil is native to Australia known for its antibacterial and antifungal properties. Tea Tree oil is also an effective insect deterrent and insect killer with a nice herbal aroma.

Pennyroyal essential oil is derived from a grass like creeper native to Europe. Pennyroyal has an aroma similar to spearmint and is a very effective insect killer.

Citronella essential oil is derived from a grass that mainly grows in Asian countries and has a rich crisp lemony aroma. Citronella is a natural insect repellent and effective repellent for head lice. Antifungal properties can also assist in healing insect bites.

Neem essential oil is derived from a multipurpose herb native to India and parts of Asia. Neem essential oil is loaded with nutrients to assist in many skin conditions. Neem oil effectively kills lice in all stages of their life cycle.

Coconut oil in our blend of base oils also helps to break down the exoskeletons of the lice and kill them. Coconut oil easily absorbs into the head and scalp and is a nice conditioner.

Tips for eradicating Head Lice

I recommend washing hair with Herbal Head Lice soap then follow with a cheap conditioner, daily to begin with then every 2-3 days for about 2 weeks. Using a fine tooth metal head lice comb available from pharmacies, comb hair daily to remove all lice and eggs from hair, concentrate on the warm parts of head, behind ears and back of neck. Breaking the head lice breeding cycle is the key.

Head lice do not jump or fly, to spread from one head to another they need hair to come in contact with. Keeping long hair tied back will help the spread of lice to others and re-infestation.

Rich and Moisturising Base Oils

Coconut Oil - Coconut Oil is good for dry, itchy and sensitive skin and also produces a hard, long lasting soap with a fluffy lather. Coconut oil can help to remove bad oil, toxins, dirt and grime.

Sunflower Oil - Sunflower oil helps to moisturise, regenerate and condition the skin. Sunflower oil also contains natural vitamin E and is rich in polyunsaturated fatty acids which help to protect the skin.

Rice Bran Oil - Rice bran oil is good for dry sensitive skin and mature or delicate skin. Rice bran contains natural antioxidants and omega-6 fatty acids which are great for the skin.

Olive Oil - The use of olive oil for skin dates back thousands of years and has very impressive benefits. Anti-aging antioxidants help skin tone and complexion, eliminate wrinkles and smooth the skin.

Shea Butter - Shea butter moisturises skin keeping it elastic and hydrated, healing fine lines and wrinkles. It is also soothing to damaged skin that has been exposed to extreme heat and cold.
